Using Tork Xpressnap® system reduces napkin usage by at least 25% compared with traditional napkin dispensers, cutting consumption and waste.

## Washroom

Making washrooms work for your business

# Helping you to choose the right product

Our tried and tested combinations are based on our customers' common needs. Whether you want to make an impression, show you care for your visitors, maintain hygiene standards or keep control of cost, we've got something that's right for you.

## What works best for your business?

### Checking traffic levels

How often you need to maintain and refill your washroom depends on how many people visit between cleaning cycles.

To help find what works best for your business, use these two categories of traffic volume:

### Low/Medium traffic

For small or medium washrooms with low/medium visitor numbers and regular maintenance cycles.

### High traffic

For larger, busier washrooms with a high volume of visitors.

### We develop our product ranges to match the different needs of our customers.

Find the right product for your washroom based on your traffic level and your washroom profile:

#### Wow Factor style washroom

- When making an impression is important

#### Washroom Plus

# Healthcare

Good healthcare starts with good hygiene

## Helping you to choose the right product

Taking care of patients, visitors and staff means you need to set high standards on hygiene. What's needed in your establishment will be unique to the services you offer and the environment your colleagues work in. Whether you're in a nursing home, hospital or clinic, you'll find something to make hygiene easier in our range.

### What works best for your business?

**We develop our product ranges to match the different needs of our customers.**

Our healthcare products are designed to suit these five common room types:

#### **Hospital patient room**

A small space with lots happening. You need to keep on top of hygiene without creating clutter.

#### **Hospital scrub room**

Where hygiene is absolutely critical, you need products that are tough on germs but care for your colleagues' skin.

#### **Hospital and clinic public areas**

With lots of through traffic, you need to balance comfort with cleanliness for infection control.

#### **Treatment room**

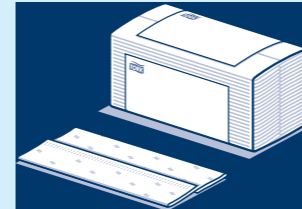

Here you need to keep patients and colleagues safe with a robust hygiene regime before, during, and after each appointment.

#### **Nursing home resident room**

Not just a room, but a home. It's important to keep up hygiene without looking too clinical.

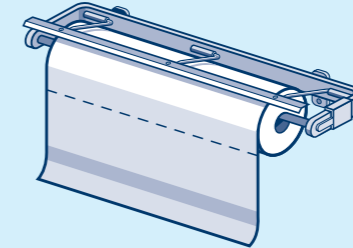

### What we offer

Our specialist products bring comfort, convenience, and hygiene to examinations, patient care, and other procedures.

#### **Wash cloths**

Designed to work with water and mild detergents for gentle but effective patient care.

#### **Couch rolls**

**Wiping and cleaning**  
The easy choice for the best result

# Helping you to choose the right product

Tork wipes, cloths and dispensers are designed to “do the work”, making tasks like wiping, cleaning, and polishing more efficient.

From one and two-ply multipurpose wiping paper, to advanced heavy duty cleaning cloths, you’ll find smart products that are extra absorbent, strong when wet, extra bulky for mopping up spills and much more. So you always get the best result.

## What works best for your business?

**We develop our product ranges to match the different needs of our customers.**

Find the right product for your workplace based on these three simple questions:

**What task do you need to do?**

Do you need a wiper or cloth for dry or wet wiping, for cleaning to remove oil and grease, or for polishing?

**What type of working space or workstation do you use?**

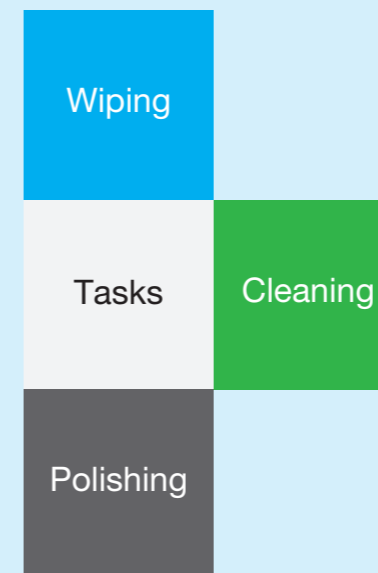

Are you at a workstation where you and others need equal access to a dispenser, or do you need to move wipes around to carry out different tasks?

**How often does this task get done, and by how many people at once?**

Do several people use wipers or cloths during the day, or does one person occasionally need to use them?

## What we offer

We’ve got a comprehensive range of specialist wipes and cloths, each designed to perform for a specific task. Add one of our dispensers to create an efficient system that controls consumption and cost.

**Wiping**

Wiping is mopping up spills, soaking up liquids and picking up dirt and dust with paper.

**Cleaning**

Cleaning is removing dirt and stains from surfaces, machines or tools with cloths that are dry or used together with water, solvents or detergents.

**Polishing**

Polishing is creating a protected and shiny surface with the help of a cloth that applies polish onto the surface and is then rubbed to obtain a good finish.

exelCLEAN™ technology for quicker professional cleaning result

Tests prove we set the standard of excellence for today’s safer, healthier, and more efficient workplaces.
